Incline Conveyors

Wrabacon designs and manufactures specialty conveyors for many companies and corporations in the food processing and packaging industry.

Designs can be Nema 4 and Nema 4x, USDA and FDA approved. Our conveyors are designed around the products to be handled. Based on product samples provided prior to beginning the design phase, we determine the appropriate belting material to best handle the product.

Conveyors are designed to run at fixed or variable speeds to fit in with existing applications a customer may be using. Our conveyors will operate independently, or can be integrated with other equipment.
