

PRODUCT BULLETIN

Wrabacon, Inc. designs and manufactures a wide variety of quality and innovative custom product handling systems. These include Product Feeders, Pick and Place Systems, Product Merging, Product Dividers, Product Stackers and Destackers, Semi-Automatic Case Erectors, Product Accumulators, Container Handling, Tray Stackers, and Conveyors.

CUSTOM ROTARY TABLE FOR CAP FEEDING

This custom rotary table was designed to hold and feed caps into an automatic capper. The rotary table holds up to 1600 caps with a feed rate of 30 caps per minute. An operator manually loaded caps from a case which is placed on the adjustable tray. Once caps are on the square table the operator would manually move a pusher arm which pushed caps onto the rotary table. Through a series of plows and guides the caps were placed into single file to be transferred to the capper via a small profile conveyor and chute.
